

Experiments in General Chemistry; And Introduction to Chemical Analysis by J. Volhard and C. Zimmermann

Filesize: 4 MB

Reviews

This type of publication is every thing and helped me seeking ahead and much more. It usually fails to charge too much. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Juliet Mertz)

EXPERIMENTS IN GENERAL CHEMISTRY; AND INTRODUCTION TO CHEMICAL ANALYSIS BY J. VOLHARD AND C. ZIMMERMANN

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1887 edition. Excerpt: .in NH₃ and NH₄Cl, easily soluble in mineral acids and in acetic acid. If the moist sulphide is exposed to the air it becomes brown, and on treating with water a part dissolves as manganous salt (P). 555 /llangarzie oxide (anhydrous as braunite, MnO₂; with water of crystallization as manganite, MnO₂·H₂O) is a very weak base whose unstable salts are cherry red or purple in solution. The phosphate is the most stable; prepare it as follows: add a few drops of NOBH to a manganous salt, add conc. phosphoric acid, and boil in a porcelain dish till the nitric acid begins to evaporate (reaction for Mn); MnO₂ colors the microcosmic bead amethyst red. All Mn compounds form this bead in the oxidizing flame; in the reducing flame the bead is colorless (P). 5194 Hydroxides of manganese dioxide, MnO₂, are formed when manganous salts are precipitated by alkali hydroxide in presence of an oxidizing agent; sodium hypochlorite (?), jBr or Cl (?), epotassium permanganate, form thus with manganous salt solutions brown precipitates of perhydroxides, Mn(OH)₂ or MnO₂·H₂O. From an acidulated (not strongly acid) solution of a manganous salt to which sodium acetate has been added, on warming with Br water (?) i1 Mn is precipitated and all other oxides of Mn riclz in O (?)J,6behave with conc. SO₄H₂, with HCl, with dilute acids and reducing agents, like the peroxide; all are reduced to manganous salt, giving up their oxygen as oxygen, or yielding an equivalent...
