Reviews

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be play, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.

WRITING RESEARCH: TRANSFORMING DATA INTO TEXT

Elsevier Health Sciences, United Kingdom, 2003. Paperback. Book Condition: New. 211 x 137 mm. Language: English . Brand New Book ***** Print on Demand *****.The primary aim of Writing Research is to create a frame of reference for writing research from a number of approaches to inquiry; and for a number of purposes. The content is directed to identifying principles for writing from within commonly used methodologies and methods in health research, which will guide writers to transform research data into written forms. The emphasis will be on the writing task, not on how to conduct the research, which follows after research data has been collected. The explanatory aspects of the content of the book will assist researchers in the development of research proposals and those who critique or review research for any purpose.
