Not illustrated. 1904 Excerpt: .make them as a contribution to the problems in solar physics. I have been interested in the paper by Prof. F. E. Nipher, on the Law of contraction of gaseous nebulae, because it seems to offer a way of escape from the impossible results which follow from Ritter s equations, where the exponent in $P u = B$ is 1.33 +. Nipher makes the value of $n = 1.10$, and from this exponent the entire system of relations seems to be more probable. I will recapitulate Nipher s equations, after making the following changes in his notation to reduce them to the symbols used in my papers: Nipher. Bigelow.
